- O<sub>2</sub> management

“When a child needs critical care speed is vital. Majesty Jet Air Ambulance teams are ready to transfer patients quickly and safely. Helping to provide the world-class level of service ”

Majesty Jet is in a direct contact with the world’s most reputed Air Ambulance operators.

Our international team of aviation specialists will assist you with worldwide medical emergency transport consultations, providing you with the best options available within the shortest time possible.

Emergency medical evacuation aircraft or Medivac/Medevac is the fastest and most efficient method of transporting and flying people needing immediate medical attention. Medivac is basically an aero-medical emergency transport service that saves lives by saving on time. Medevac is used for the critically ill and for people who cannot travel long distances because of age, limited mobility or illness. Medivac is also useful for people living in remote locations or areas of difficult access where suitable medical facilities are not available. Medevac is also used for individuals whose medical needs would not be fully met by a ground ambulance.

With its extensive online database and expertise around the world, Majesty Jet provides Medivac Air Ambulance Aircraft suited to the condition and requirements of the patient.

Medevac Air Ambulance Aircraft can generally be mobilized within hours. Our air charters’ fastest response has been 45 minutes from request to take off.

# We Save lives

---

Majesty Jet Medivac aircraft are fully-fledged air ambulances with complete medical equipment including an ICU, oxygen, doctors and emergency operating facilities and more. On the other hand, a specialized helicopter fitted with stretchers for the transport of the infirm, can also be used. Facilities provided on a Medevac or Air Ambulance are dependant on the requirements of the client.

We assist individuals, businesses, insurance companies, private clinics with private air ambulance medical repatriation, evacuation and secure patient transfers.

# PRIVATE CHARTER OPERATIONS

Majesty Jet offers on-demand access to the most advanced and luxurious private charter aircraft. Our best-in-class executive fleet includes spacious large-cabin jets, well-appointed mid-size jets and economical light-jet aircraft options. Majesty Jet welcomes the opportunity to provide quotes in the aircraft you select or one that our team of professionals will recommend that best accommodates your trip profile.

Our experienced team is available to assist with quoting, flight coordination, flight following and to provide travel advice and consultation – 24 hours a day, 365 days a year.

# PRIVATE CHARTER OPERATIONS

# SAFETY FIRST

While luxury, convenience and access to the world's most exclusive aircraft are a few of the reasons corporations and individuals choose Majesty Jet as their preferred charter provider, we have earned their trust by ensuring that, above all else, safety is our number one priority. From the aircraft we manage to our maintenance staff, flightcrews and ground support personnel, the emphasis is always on safety. We operate our private charter services under the stringent mandates of International Aviation Regulations.
